

WOOL FELT

TTN Wool Felt is made of high quality natural wool, compare with the other common wool, it is more fine and smooth. It is soft as well as coriaceous, with good fiber elasticity and comfortable touch feeling. Colorful wool felt has the good reducibility, it's hard to be out of shape. Most important, it's eco-friendly and recycled, widely used for craft and other decoration

advantage:

- Anti-static & Eco-friendly
- Fire resistance & Good wear ability
- anti-tearing & Sound insulation
- Super flexibility & High cross force
- not easy loose deformation & Oil absorbility

Applications

- Aerospace
- Military Project
- Mechanical Engineering
- Electronics
- Metallurgy
- Chemical Industry
- Mine Industry
- Vehicles and ships and so on

Product Name	Wool Felt	
Material	100% Wool	
Thickness	1 – 50mm	
Density	Coiled Material	0.2-0.35g/cm ³
	Sheet	0.3-0.5g/cm ³
Thickness	1.5 mm - 3.0 mm	
Width	1m, 1.5m,2m / Customized	
Packing	In roll packing with plastic bag outside or customized
